

# 2<sup>nd</sup> ITF Statistical Meeting 1-2 April 2015- PARIS

5.3 – Common Questionnaire  
2013 data collection

## **Background information**

### **Common to 3 organisations –Eurostat/UNECE/ITF**

Detailed data for :

- 4 inland transport statistics

Rail, Road, Inland waterways and Pipeline transport

- 5 themes

Infrastructure, transport equipment, enterprises, traffic and transport measurement

## What does it offer

- Core detailed transport information supported by the 3 Organisations
- Variables defined in the « Glossary for transport statistics »
- Consistent and harmonised transport data
- Hundreds of historical series for international data comparison
- Great potential to calculate/derive transport indicators
- Available on a web site hosted by Eurostat (to facilitate access process and checks)

## Not all ITF countries complete it

- ❑ Currently used for the 58 UNECE countries (which include all Eurostat and European ITF countries)
- ❑ We should include all our members in this data collection
  - To enable a broader scope of transport data analysis
  - To offer a platform with a global view on transport statistics

## Next Steps

- Technically we will be ready this fall
- To reduce the burden we will produce a light version of the questionnaire
- This has to be agreed by the 3 organisations (talks going on)
- This remains a voluntary data collection
- USA and Canada already complete it
- We need all the other non european ITF members to join

# Thank you
