Subject: Change of paper material standard

Dear Sir/Madam,

I am writing to inform you that the type of paper material used for printing the form 'CEMT – Certificate for the technical inspection of motor vehicles and trailers' has been changed. The change concerns the weight of the paper (g/m<sup>2</sup>) from the previous 50–54 grams to the currently determined 60 grams. This also entails an increase in the thickness of the sheet of paper.

The rest (i.e. the print and design) complies with the applicable regulations; the content of the Certificate is not affected by the above mentioned change. This information has been sent to you with a view to avoiding any eventual difficulties regarding inspections of Slovenian road transporters by the relevant supervision authorities.

You are kindly asked to inform all the competent supervision authorities that this information applies to all those Slovenian road transporters which are in possession of the 'CEMT – Certificate for the technical inspection of motor vehicles and trailers' numbered **8027101** and upwards.

Yours faithfully,

  
Bojan Zlender, MSc.  
Secretary  
Director - General
